

Evaluate a broad range of psychopathology with the PAI family

One of the most important innovations in personality assessment

Available on PARiConnect! The **Personality Assessment Inventory (PAI)** features 344 items that comprise 22 nonoverlapping scales covering the constructs most relevant to a broad-based assessment of mental disorders.

[Learn more at parinc.com/PAI](http://parinc.com/PAI)

Now available!

The **PAI Plus** is now on PARiConnect and as part of the PAI Software Portfolio—based on *DSM-5*® criteria, and featuring a new manual supplement, new report options, and content-specific norm groups.

An objective personality assessment for use with adolescents

Available on PARiConnect! The **Personality Assessment Inventory—Adolescent (PAI-A)** is a self-administered, objective test of personality designed to provide information relevant to clinical diagnosis, treatment planning, and screening for psychopathology.

Quickly screen for a broad range of psychopathological issues

Available on PARiConnect! The **Personality Assessment Screener (PAS)** quickly screens for major domains covered in the PAI and is designed for use as a triage instrument in healthcare and mental health settings, corporate EAPs, and college health services.

Get another perspective

The **Personality Assessment Screener-Observer (PAS-O)** is the **ONLY** measure of psychopathology normed on informant and self-report discrepancies.
