

Understand a youth's level of risk for violence and underlying disordered thinking

Assess risk of dangerousness, sophistication/maturity, and treatment amenability

The **Risk-Sophistication-Treatment Inventory™ (RSTI™)** is an interview and rating scale designed to help you plan treatment for juvenile offenders ages 9 to 18 years. Administration time is 150 to 180 minutes. Available in paper and pencil.

Assess the underlying thoughts that predispose violent behavior in adolescents

Designed on the basic hypothesis that an individual's thought process strongly influences his or her behavior, the **Firestone Assessment of Violent Thoughts™-Adolescent (FAVT™-A)** measures different types of thoughts that have been found to predispose an adolescent ages 11 to 18 years to violent behavior. Administration time is 15 minutes. Available in paper and pencil.

Assess adolescent psychopathology

The **Personality Assessment Inventory™-Adolescent (PAI®-A)** is an objective personality assessment for use with adolescents ages 12 to 18 years. Administration time is 30 to 45 minutes. Available in paper and pencil, as a software download, for the PAR professional report service, and for **online administration and scoring via PARiConnect**.

Now in Spanish: The PAI-A Softcover Reusable Item Booklet and Hand-Scorable Answer Sheet!

Assess risk of violence

Based on the structured professional judgment (SPJ) model, the **Structured Assessment of Violence Risk in Youth™ (SAVRY)** helps you structure an assessment so that important factors will be emphasized when you formulate a final professional judgment about a youth's (ages 12 to 18 years) level of risk. Administration time is 10 to 15 minutes. Available in paper and pencil.

The gold-standard rating form for executive function testing

The **Behavior Rating Inventory of Executive Function®, Second Edition (BRIEF®2)** assesses executive function behaviors in the school and home environments for children ages 5 to 18 years. Administration time is 10 minutes. Available in paper and pencil or **online administration and scoring via PARiConnect**. The **BRIEF®2 Screening Form** is also available and takes just 5 to 10 minutes to administer. **The BRIEF®2 ADHD Form**, now a part of the BRIEF2 Interpretive Report, uses BRIEF2 scores and classification statistics within an evidence-based approach to predict likelihood of ADHD and determine subtype.

Now on PARiConnect: A new BRIEF2 Score Report, an updated BRIEF2 Interpretive Report, and BRIEF2 Interventions Handouts!
