

PDD Behavior Inventory™ Screening Version (PDDBI™ -SV)

Brief Interpretive Report

Developed by Ira L. Cohen, PhD & PAR Staff

Name:	Client Sample	Client ID:	1349
Age:	9 years, 6 months	Birthdate:	01/23/2002
Gender:	Female	Test Date:	08/16/2011
Ethnicity:	Caucasian		
Rater/Relationship:	Mrs Jackson / Mother		

Scale scores	
<i>SOCPP-SV</i> Raw	4
<i>SOCAPP-SV</i> Raw	0

Social Deficits (SOCDEF) Score		
Raw	T	90% CI

		—	5	28	
		●	4	27	
		—	3	26	
		—	2	25	
		—	1	23	
		—	0	≤22	

Interpretation: Level 1, Unlikely

Children on the autism spectrum will rarely achieve scores in this range (only about 2% of children with recognized autism score this low), and those who do are very mildly affected. Such a score can be interpreted to mean that the caregiver does not perceive the child as having such social deficits.

Recommendation:

If this result seems to contrast with other information, a repeat or more thorough evaluation may be indicated.

Of course, no one score should be used in the determination of a diagnosis, and other supporting factors, such as behavioral observation, history of symptoms, and other testing results, should be considered when making recommendations or giving feedback. Further, the veracity of this report is contingent on the rater's ability to accurately assess the patient.

Item Responses

<i>SOCPP-SV</i> Items		<i>SOCAPP-SV</i> Items	
No.	Response	No.	Response
1.	Does not show behavior	10.	Usually/Typically shows behavior
2.	Does not show behavior	11.	Usually/Typically shows behavior
3.	Rarely shows behavior	12.	Usually/Typically shows behavior
4.	Does not show behavior	13.	Usually/Typically shows behavior
5.	Does not show behavior	14.	Usually/Typically shows behavior
6.	Rarely shows behavior	15.	Usually/Typically shows behavior
7.	Does not show behavior	16.	Usually/Typically shows behavior
8.	Does not show behavior	17.	Usually/Typically shows behavior
9.	Sometimes/Partially shows behavior	18.	Usually/Typically shows behavior
