

## Gather comprehensive client information for a personal injury claim

### Objectively evaluate loss of earning capacity claims

The **Earning Capacity Assessment Form™–2nd Edition (ECAFM™-2)** aids vocational rehabilitation evaluations by providing a method to guide the process of evaluating a claim of loss of earning capacity for individuals across the life span. Administration time is 5 to 10 minutes. Available in paper and pencil.

### Assess your clients' pain coping strategies

Designed to assess the use of coping strategies that are typically targeted for change in multidisciplinary pain treatment programs, the **Chronic Pain Coping Inventory™ (CPCI™)** can be used as a treatment outcome measure, as a screening measure, and to document the necessity of treatment in individuals ages 20 to 80 years. Administration time is 10 to 15 minutes. Available in paper and pencil, as a software download, and for **online administration and scoring via PARiConnect**.

## Get a broader picture of your clients' executive function skills

Used primarily to assess perseveration and abstract thinking, the **Wisconsin Card Sorting Test<sup>®</sup> (WCST<sup>®</sup>)** allows you to assess your client's (ages 6:5 to 89 years) strategic planning; organized searching; and ability to use environmental feedback to shift cognitive sets, direct behavior toward achieving a goal, and modulate impulsive responding. Administration time is 20 to 30 minutes. Also available in a 64-card version (**WCST-64<sup>™</sup>**) and a modified version that includes 48 cards (**M-WCST<sup>™</sup>**). Available in paper and pencil, as a software download, and for **online administration and scoring via PARiConnect** (WCST and WCST-64 only).
